CORTECH DEVELOPMENTS - YOUR TRUSTED INTEGRATION PARTNER

Established in 1992, Cortech Developments is a UK-based specialist in software integration for security, fire, safety, and smart building technologies.

We deliver powerful command and control solutions that enable organisations to unify systems, improve operational efficiency, and make better, faster decisions, particularly in high-security environments and critical infrastructure.

As a completely independent provider, we are not tied to any manufacturer. This allows us to deliver truly flexible, future-proof solutions, helping you maximise existing investments while embracing new technologies.

TRUSTED PROVEN SECURE

With over 30 years of experience, Cortech solutions are trusted by organisations operating in some of the most demanding environments.

- Deployed in multiple countries worldwide
- Supporting critical national infrastructure
- Proven across high-security and highly regulated sectors
- Over three decades of integration expertise

ACCREDITED & COMPLIANT

Our commitment to quality, security, and sustainability is demonstrated through:

- ISO 9001 – Quality Management
- ISO 27001 – Information Security Management
- Cyber Essentials – Cyber security assurance
- Carbon Neutral certification – Supporting sustainable operations
- Made in Britain – Designed and developed in the UK

These accreditations ensure our solutions meet the highest standards—giving you confidence in both performance and compliance.

INTRODUCING DATALOG

At the heart of our offering is Datalog, a powerful, modular software platform that brings all your systems together into a single, intuitive interface.

From access control and CCTV to fire, perimeter protection, building management, and emerging technologies, Datalog provides:

- A single point of control
- Real-time system visibility
- Intelligent alarm management
- Complete operational oversight

By transforming disconnected systems into a unified platform, Datalog enhances situational awareness, reduces risk, and improves response times across your entire estate.

CENTRALISED MONITORING & CONTROL

Modern control rooms are under increasing pressure, managing multiple systems, responding to simultaneous events, and maintaining accountability.

Without integration, this often leads to:

- Fragmented information across systems
- Operator dependency on experience
- Inconsistent responses
- Limited accountability and auditability

Datalog changes this. Our integrated platform enables:

- Clear identification and prioritisation of events
- Guided operator response with on-screen instructions
- Automatic video verification via CCTV
- A consistent operating environment across all systems
- A single database delivering a complete audit trail

The result is a smarter, more efficient control room, where operators are empowered to respond quickly, accurately, and confidently.

TRULY INDEPENDENT COMPLETELY FLEXIBLE

Unlike manufacturer-led solutions, Cortech remains fully independent, allowing us to integrate the technologies that are right for you, not limited by vendor constraints.

This ensures:

- Greater flexibility in system design
- Freedom to choose best-in-class technologies
- Protection of existing investments
- Future-proof, scalable solutions

ENGINEERED FOR CRITICAL ENVIRONMENTS

We understand the operational demands of high-security and business-critical environments, delivering solutions tailored to each sector:

- **Prison and Custodial** – Enhancing safety, control, and compliance
- **Secure Healthcare** – Protecting people, assets, and sensitive environments
- **Utilities** – Securing distributed and remote infrastructure
- **Transport** – Supporting safe and efficient operations
- **Government & Defence** – Delivering secure, resilient solutions
- **Higher Education** – Supporting campus-wide security, access control, and safety management
- **Stadia and Arenas** – Managing large-scale event venues with integrated security and safety systems
- **Retail** – Enhancing customer safety, loss prevention, and operational efficiency

GLOBAL DEPLOYMENT LOCAL UNDERSTANDING

Datalog is deployed across multiple countries, supporting organisations with complex, multi-site operations.

OUR EXPERIENCE ENABLES US TO DELIVER CONSISTENT, RELIABLE PERFORMANCE ACROSS DIFFERENT REGULATORY, OPERATIONAL, AND ENVIRONMENTAL REQUIREMENTS, ENSURING YOUR SYSTEMS WORK SEAMLESSLY, WHEREVER THEY ARE DEPLOYED.

OUR EXPERIENCE ENSURES THAT DATALOG SUPPORTS THE UNIQUE CHALLENGES OF EACH ENVIRONMENT, WHILE MAINTAINING A CONSISTENT AND INTUITIVE USER EXPERIENCE.

SMARTER BUILDING PERFORMANCE

Buildings are constantly evolving and your systems should evolve with them.

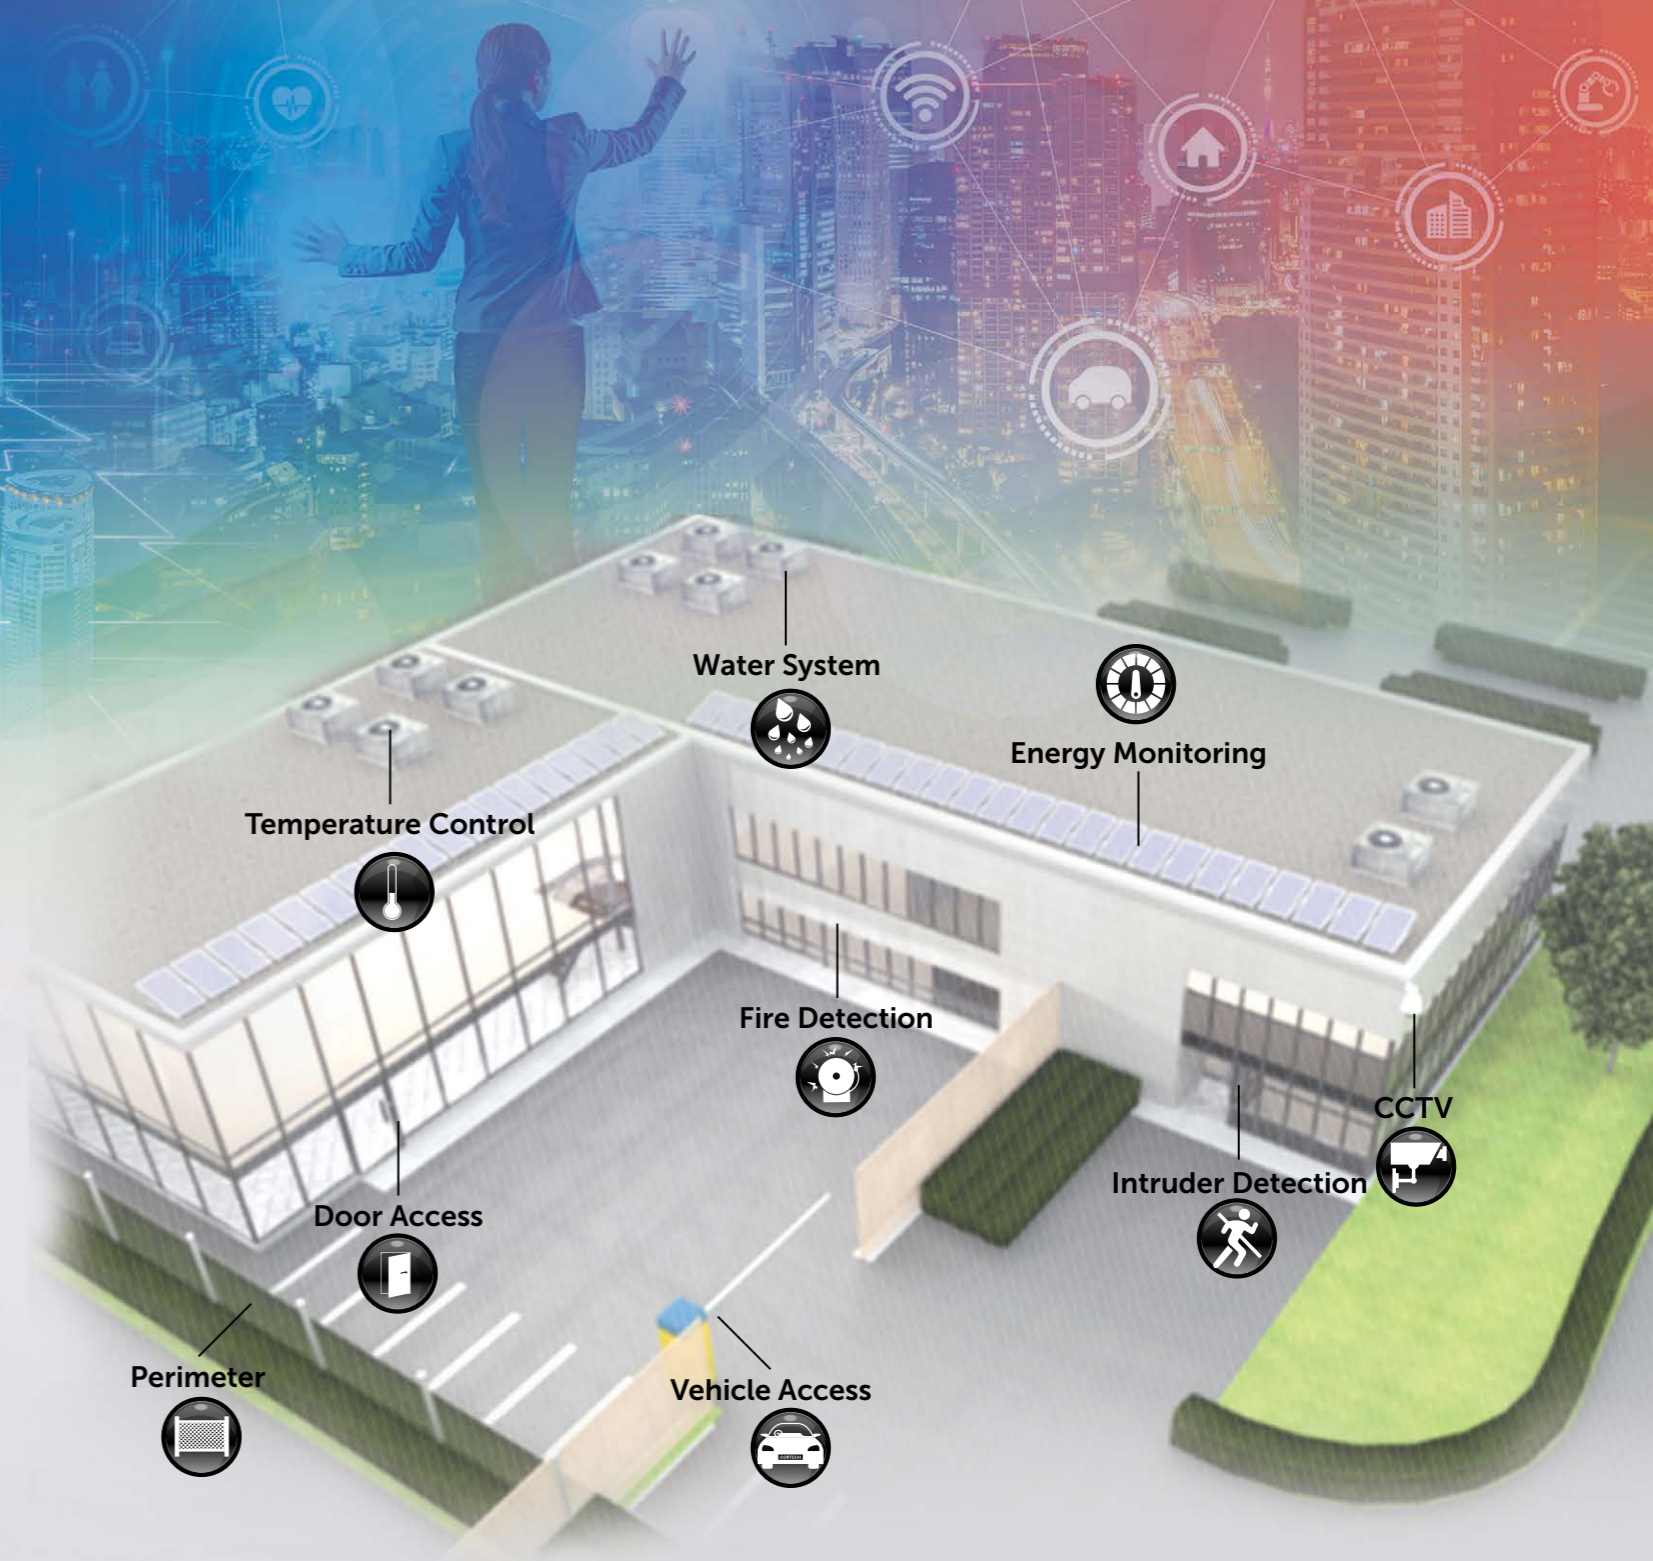

Datalog enables a truly interoperable approach to building management, delivering:

- A consistent "look and feel" across all systems
- Centralised monitoring and control
- Advanced alarm handling and analytics
- Insight-driven reporting

By improving visibility of system data, you can:

- Optimise building performance
- Enhance safety and security
- Improve energy efficiency
- Reduce operational overhead

With real-time monitoring and intelligent insights, Datalog supports smarter, more sustainable buildings.

TAILORED SOLUTIONS & SUPPORT

Every environment is different. That's why we deliver fully tailored solutions, backed by expert support.

Software Development

We continuously develop and integrate with both new and existing technologies, ensuring our solutions remain innovative, flexible, and future-ready.

Innovation Through Partnership

By working closely with our Technical Partners and end users, we ensure our solutions evolve to meet real-world challenges.

Visualisation

Our in-house team delivers high-quality graphical interfaces, including detailed site maps and floor plans enabling fast, intuitive response to events.

Training

Interactive, hands-on training ensures operators are confident, capable, and ready to maximise system performance.

Support

Comprehensive support services provide peace of mind, with remote assistance to keep systems running smoothly.

Information Security

Security is embedded into everything we do, ensuring your systems and data remain protected at all times.

A COMPLETE INTEGRATED SOLUTION

Datalog enables you to unify:

- Security systems
- Fire detection
- Safety systems
- Building management technologies

Into one cohesive platform, delivering:

- Greater visibility
- Improved accountability
- Faster response times
- Lower cost of ownership

LET'S TALK

WHETHER YOU'RE AN END USER, CONSULTANT, INTEGRATOR, OR MANUFACTURER, WE'LL WORK WITH YOU TO DESIGN A SOLUTION THAT MEETS YOUR EXACT REQUIREMENTS.
