

Transforming Safety, Security & Efficiency in Stadiums, Venues and Event Spaces

Stadiums present one of the most complex operational environments for security and safety management. With capacities reaching tens of thousands, and with frequent transitions between matchdays, concerts, and public events, the risks and operational pressures are significant.

From access control and perimeter breaches to emergency evacuation and large-scale crowd management, stadium operators must respond quickly, consistently, and efficiently.

Key Challenges:

- ✓ **High Footfall & Variable Usage** – Sudden influxes of thousands of spectators create immense pressure on entry systems, CCTV, and emergency procedures.
- ✓ **System Fragmentation** – Security, fire, and building systems often operate in isolation, delaying coordinated responses.
- ✓ **Dynamic Risk Profiles** – Matchdays, high-profile fixtures, or concerts require enhanced threat response and custom escalation protocols.
- ✓ **Downtime & Operational Cost** – Delays in identifying faults or responding to incidents can lead to event disruption and increased cost.

The Cortech Solution

Cortech's Datalog platform provides a centralised unified solution that integrates your safety, security, and building control systems into one platform, enabling faster response times, structured incident workflows, and improved control room coordination.

KEY BENEFITS

Faster Incident Response:

Automatically pinpoint and verify alarm activations, triggering predefined workflows across security teams.

Reduced Downtime:

Smart automation ensures maintenance issues are flagged early and resources are used efficiently.

Scalable & Secure:

Built for the future, Datalog grows with your venue and supports evolving compliance and safety needs.

Unified Command & Control

Operate CCTV, fire alarms, access control, intercoms, crowd sensors, and PA systems from a single interface.

Tailored Event Mode Protocols:

Configure workflows for different threat levels and event types (matchdays, concerts, VIP visits).

Delivering peace of mind for operators, spectators, and event partners, before, during, and after every event.
