DATALOG QL

BRING VIDEO, ALARMS, AND OPERATIONAL INTELLIGENCE
TOGETHER IN ONE SECURE, RESILIENT PLATFORM.

 Cortech Developments

INTRODUCING DATALOG QL MV

Datalog QL MV is the next generation of Cortech's proven CCTV management capability, re-engineered for the Datalog QL platform.

It delivers centralised, multi-vendor CCTV monitoring working alongside Datalog QL to fully integrate alarm, events, and operational data, giving control rooms a complete visual and situational picture in one secure, resilient system.

Built on the trusted foundations of Datalog MV, QL MV transforms video from a standalone tool into an integral part of your QL-managed estate.

WHY INTEGRATED VIDEO MATTERS

Modern estates are complex, and operators need rapid visual verification to respond effectively. Datalog QL MV places video at the heart of operational decision-making.

-  **No switching between systems**
-  **No fragmented operator workflows**
-  **No vendor lock-in**
-  **No loss of resilience**

DESIGNED FOR TODAY'S OPERATIONAL DEMANDS

-  **Mission-critical environments**
-  **High-pressure incident response**
-  **Multi-site, multi-vendor estates**
-  **24/7 control room operations**

THE QL DIFFERENCE.

VIDEO THAT WORKS AS PART OF THE BIGGER PICTURE

Datalog QL MV brings live and recorded video from CCTV systems directly into the Datalog QL environment, aligned with alarms, incidents, and workflows. Operators can see exactly what's happening, when it matters most.

INTEGRATED VIDEO, NOT A SILOED SYSTEM

Integrate your VMS platforms, QL MV is a native extension of Datalog QL, not a bolt-on.

Video feeds are linked directly to alarms and events

Cameras can automatically display based on system activity

Operators view video alongside dashboards, site plans, and incident data

Operators can also choose to view 3rd party applications and browser-based information within the Datalog QL MV environment for a truly seamless approach.

The result: a true single pane of glass for security and operations.

DATALOG QL

PART OF THE DATALOG QL ECOSYSTEM

QL MV is one of a suite of modular capabilities within Datalog QL, working alongside alarm management, dashboards, and integrations to deliver a unified operational solution.

CENTRALISED MULTI-VENDOR CCTV

QL MV supports integration with a wide range of third-party CCTV and video management platforms, presenting a consistent operator experience regardless of manufacturer. Benefits:

- **Preserve existing CCTV investments**
- **Avoid proprietary lock-in**
- **Standardise operator training across mixed estates**

FLEXIBLE VIDEO WALLS & OPERATOR LAYOUTS

Operators can configure layouts to suit operational needs:

- **Multi-camera and video wall views**
- **Mixed displays combining video, dashboards, and site data**
- **Site-specific or role-based layouts**
- **Optimised for day-to-day monitoring or high-pressure incident response**

LIVE & RECORDED VIDEO WHEN IT MATTERS

Supports rapid verification, post-incident investigation, and reporting, all from within the Datalog QL environment. Operators can:

- **View live video feeds**
- **Review recorded footage**
- **Access pre- and post-alarm video**
- **Perform simultaneous playback across multiple cameras**

RESILIENT BY DESIGN

QL MV is engineered for mission-critical environments. Even if external video wall systems or third-party components fail, video availability is maintained within the control room, ensuring uninterrupted situational awareness.

SECURE, SCALABLE AND FUTURE-READY

As part of Datalog QL, QL MV benefits from the platform's Secure by Design architecture:

01 : Centralised configuration, user authentication and permissions

02 : Ongoing platform development and enhancements

Your video capability evolves alongside your wider QL deployment.

KEY FEATURES AT A GLANCE

-  **Integrated video management within Datalog QL**
-  **Centralised multi-vendor CCTV support**
-  **Live and historical video playback**
-  **Alarm-driven automatic camera presentation**
-  **Custom video wall and screen layouts**
-  **Resilient operation for critical environments**
-  **Scales from single sites to large multi-estate deployments**

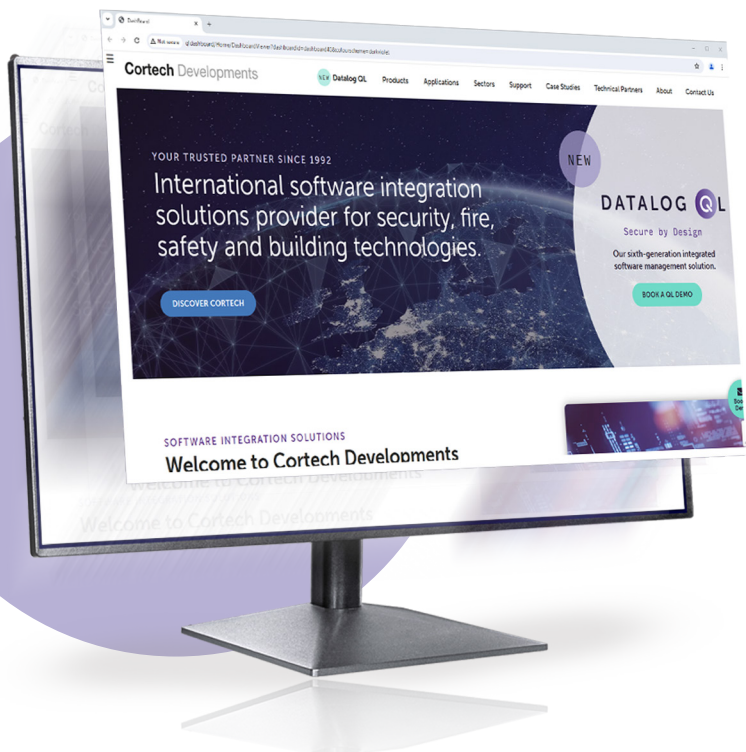

KEY BENEFITS AT A GLANCE

-  **Faster, More Confident Decision-Making** – Instant access to live and recorded video alongside real-time events for rapid verification and response.
-  **Improved Operator Efficiency** – Streamlines workflows, reducing manual intervention.
-  **Maximise Existing Investments** – Enables integration with multi-vendor CCTV systems.
-  **Resilience You Can Rely On** – Maintains video availability to ensure continuous situational awareness.
-  **Scalable for Growing Estates** – Supports deployment from single sites through to large, multi-site environments.

TRANSFORM VIDEO INTO OPERATIONAL INTELLIGENCE

Datalog QL MV elevates CCTV from passive monitoring to active operational insight, helping teams observe, verify, respond, and report with confidence.
